LeetCode | GeeksForGeeks | Coding Ninjas

Professional Summary

Computer Engineering student (B.Tech, 2027) building reliable, scalable backend services and REST APIs, with hands-on experience designing **microservices** architectures. Strong **SQL** and relational database skills (**PostgreSQL**, **MySQL**): schema design, query composition and optimization. Proficient in **Java**, **TypeScript** and **Node.js**/**Express**, with solid **Data Structures, OOP** and problem-solving foundations. Experienced in **CI**/**CD** automation (GitHub Actions), containerized deployment (**Docker**) on Linux, and Prometheus/Grafana monitoring. Active open-source contributor.

Education

Siksha 'O' Anusandhan (ITER) — Bhubaneswar, India
Bachelor of Technology in Computer Engineering (CGPA: 7.81) — *Sept 2023 – Expected July 2027*

Prabhujee English Medium School — Bhubaneswar, India
Intermediate / 12th (Percentage: 62.08%) — *2021 – 2023*

Technical Skills

Languages: Java, SQL, C++, TypeScript, JavaScript (ES6+), C, Python (Working Knowledge)
Backend & Microservices: Microservices, RESTful API Design, Node.js, Express.js, JWT Authentication, WebSockets
Databases & SQL: PostgreSQL, MySQL, SQL Query Optimization, Schema Design, Prisma ORM, Drizzle ORM
DevOps & Monitoring: Docker, Linux, AWS (EC2, S3, Auto Scaling), CI/CD, Turborepo, Prometheus, Grafana
Core CS Foundations: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks
Frontend & Mobile: ReactJS, React Native, Redux, HTML5, CSS3, Tailwind CSS

Projects

App Forge — AI Mobile App Builder | *Next.js, Express, Microservices, Prisma, AWS, Docker* — GitHub | Live
- Architected a scalable Bun + Turborepo monorepo of four **microservices** (Next.js frontend, Express REST API, generation worker, AWS EC2 Auto Scaling orchestrator) secured with Clerk auth and a Prisma/**PostgreSQL** data layer.
- Containerized every service with **Docker**, automated multi-image **CI**/**CD** via GitHub Actions, and deployed across Vercel, Render, and Neon.
- Engineered an AI-powered platform that transforms natural-language prompts into production-ready React Native (Expo) applications, streaming LLM-generated code into a live in-browser WebContainer preview.

Sonexa — Social Music Streaming Platform | *Next.js, TypeScript, Prisma, PostgreSQL, Docker* — GitHub | Live
- Built a full-stack music streaming app with instant track search, YouTube/Spotify playback, and a creator dashboard for managing live queues.
- Implemented real-time listening rooms with synchronized playback, presence tracking, and community upvoting to shape the shared queue.
- Architected a pnpm + Turborepo monorepo with a shared **Prisma** DB package, containerized deployment, and GitHub Actions **CI**/**CD** for Docker builds.

Collaborative Real-Time Whiteboard | *Next.js, TypeScript, WebSockets, Prisma, Docker* — GitHub | Live
- Architected a custom **WebSocket protocol** to handle asynchronous events, ensuring state synchronization across clients with sub-50ms latency.
- Engineered a touch-responsive collaborative canvas using the Raw HTML5 Canvas API, optimizing client-side performance and frame rendering across devices.

Freshly — Cross-Platform Grocery & Meal Planner | *React Native, Expo, TypeScript, PostgreSQL* — GitHub | Live
- Designed a **PostgreSQL** schema via Drizzle ORM on Neon's serverless driver, exposing **REST** endpoints for item CRUD, bulk-clear operations, and category/spending insights.
- Built a cross-platform (iOS, Android, Web) grocery list and meal planner app with Expo Router and typed API routes, backed by Clerk authentication and secure token storage.
- Automated EAS builds/OTA updates and lint/typecheck **CI**/**CD** via GitHub Actions, with Sentry error tracking in production.

Certifications & Awards

KFintech Internship — Applied Fintech Engineering & Mutual Fund Technology: Completed program by KFin Technologies Ltd. with SOA University, covering transaction systems, regulatory compliance, data analytics, and cloud/DevOps.
Full Stack Web Development (100xDevs): Cohort-based training by Harkirat Singh on scalable systems and backend design.
Advanced Problem Solving: Certified by HackerRank for demonstrating strong proficiency in Data Structures and Algorithms.
LeetCode 500 Days Badge / GitHub Traction: 500+ day problem-solving streak and active open-source contributions.
Generative AI Systems: Certified by Microsoft via LinkedIn Learning.
