LeetCode | GeeksForGeeks | Coding Ninjas

Professional Summary

Computer Engineering student and former KFintech intern specializing in scalable full-stack and cross-platform mobile development with **ReactJS**, **TypeScript**, and **React Native**. Strong background in relational database design (**PostgreSQL**), API architecture, and containerized deployment (**Docker**) on **Linux** with **Prometheus**/**Grafana** monitoring. Active open-source contributor with strong problem-solving skills.

Education

Siksha 'O' Anusandhan (ITER) — Bhubaneswar, India
Bachelor of Technology in Computer Engineering (CGPA: 7.81) — *Sept 2023 – Expected July 2027*

Prabhujee English Medium School — Bhubaneswar, India
Intermediate / 12th (Percentage: 62.08%) — *2021 – 2023*

Experience

KFin Technologies Ltd. (KFintech) — Bhubaneswar, India
Intern – Applied Fintech Engineering & Mutual Fund Technology — *May 2026 – July 2026*

- Completed KFintech's campus internship program with **SOA University** in **fintech engineering**, **data systems**, and **mutual fund technology**.
- Covered **data management**, **analytics**, **cloud & DevOps**, **transaction systems**, and **regulatory compliance** in financial services.

Technical Skills

Frontend & Mobile: ReactJS, React Native, TypeScript, JavaScript (ES6+), Redux, HTML5, CSS3, Tailwind CSS
Backend Engineering: Node.js, Express.js, Python (Working Knowledge), RESTful API Design, JWT Authentication
Databases & ORM: PostgreSQL, MySQL, Relational Database Schema Design, SQL Query Optimization, Prisma ORM
DevOps & Monitoring: Docker, Linux, AWS (EC2, S3, Auto Scaling), CI/CD, Turborepo, Prometheus, Grafana
Core CS Foundations: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks
Languages: C++, TypeScript, JavaScript, SQL, C, Java

Projects

App Forge — AI Mobile App Builder | *Next.js, React Native, TypeScript, Prisma, AWS, Docker* — GitHub | Live

- Engineered an AI-powered platform that transforms natural-language prompts into production-ready **React Native (Expo)** applications, streaming LLM-generated code into a live in-browser **WebContainer** preview.
- Architected a scalable **Bun + Turborepo** monorepo of four microservices (Next.js frontend, Express API, generation worker, **AWS EC2 Auto Scaling** orchestrator) secured with **Clerk** auth and a **Prisma**/**PostgreSQL** data layer.
- Containerized every service with **Docker**, automated multi-image **CI/CD** via **GitHub Actions**, and deployed across Vercel, Render, and Neon with a server-side **Expo tunnel** for instant on-device previews.

Sonexa — Social Music Streaming Platform | *Next.js, TypeScript, Prisma, PostgreSQL, Docker* — GitHub | Live

- Built a full-stack music streaming app with instant track search, YouTube/Spotify playback, and a creator dashboard for live queues.
- Implemented real-time listening rooms with synchronized playback, presence tracking, and community queue upvoting.
- Architected a **pnpm + Turborepo** monorepo with a shared **Prisma** DB package and **GitHub Actions CI/CD** for Docker builds.

Collaborative Real-Time Whiteboard | *React/Next.js, TypeScript, WebSockets, Prisma, Docker* — GitHub | Live

- Engineered a touch-responsive collaborative canvas on the **Raw HTML5 Canvas API**, optimizing frame rendering across devices.
- Architected a custom **WebSocket protocol** for asynchronous events, syncing state across clients with sub-50ms latency.

Freshly — Cross-Platform Grocery & Meal Planner | *React Native, Expo, TypeScript, PostgreSQL* — GitHub | Live

- Built a cross-platform (iOS, Android, Web) grocery list and meal planner app with **Expo Router** file-based routing and typed API routes, backed by **Clerk** authentication and secure token storage.
- Designed a **PostgreSQL** schema via **Drizzle ORM** on Neon's serverless driver, exposing REST endpoints for item CRUD, bulk-clear operations, and category/spending insights.
- Implemented global state with **Zustand** and a NativeWind/Tailwind UI, and automated **EAS** builds/OTA updates and lint/typecheck **CI/CD** via GitHub Actions, with **Sentry** error tracking in production.

Certifications & Awards

Full Stack Web Development (100xDevs): Cohort-based training by Harkirat Singh on scalable systems and backend design.
LeetCode 500 Days Badge / GitHub Traction: 500+ day problem-solving streak and active open-source contributions.
Advanced Problem Solving: Certified by HackerRank for demonstrating strong proficiency in Data Structures and Algorithms.
Generative AI Systems: Certified by Microsoft via LinkedIn Learning.
