LeetCode | GeeksForGeeks | Coding Ninjas

Professional Summary

Full-stack builder (B.Tech Computer Engineering, 2027) who ships features end to end across mobile (**React Native/Expo**), web (**Next.js**, React), **REST/WebSocket** backends and **PostgreSQL**. Built and deployed four projects, including a cross-platform iOS/Android/Web app, **real-time** listening rooms and an **AI app builder** that streams **LLM-generated code** into a live preview. Comfortable debugging across client, API and data layers, with **Docker**, **CI/CD** (GitHub Actions) and **Sentry** monitoring in production. Use **Claude Code** as an AI coding assistant and care about the user experience of what I ship.

Education

Siksha 'O' Anusandhan (ITER) — Bhubaneswar, India
Bachelor of Technology in Computer Engineering (CGPA: 7.81) — *Sept 2023 – Expected July 2027*

Technical Skills

Frontend & Mobile: React Native, Expo, ReactJS, Next.js, TypeScript, JavaScript (ES6+), Redux, Zustand, Tailwind CSS
Backend & APIs: RESTful API Design, WebSockets (real-time), Node.js, Express.js, Microservices, JWT / Clerk Authentication
Databases: PostgreSQL, MySQL, SQL Query Optimization, Relational Schema Design, Prisma ORM, Drizzle ORM
Languages: TypeScript, JavaScript, Java, Python (Working Knowledge), SQL, C++, C
DevOps & Cloud: Git, Docker, Linux, AWS (EC2, S3, Auto Scaling), CI/CD (GitHub Actions), EAS Builds, Sentry
AI Tools: Claude Code (AI coding assistant), LLM code-generation workflows (project), Generative AI Systems (certified)
Core CS Foundations: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Projects

App Forge — AI Mobile App Builder | *Next.js, React Native, TypeScript, Prisma, AWS, Docker* — GitHub | Live
- Engineered an AI-powered platform that transforms natural-language prompts into production-ready React Native (Expo) applications, streaming **LLM-generated code** into a live in-browser WebContainer preview.
- Architected a scalable Bun + Turborepo monorepo of four **microservices** (Next.js frontend, Express API, generation worker, AWS EC2 Auto Scaling orchestrator) secured with **Clerk authentication** and a Prisma/PostgreSQL data layer.
- Containerized every service with **Docker**, automated multi-image **CI/CD** via GitHub Actions, and deployed across Vercel, Render, and Neon with a server-side Expo tunnel for instant on-device previews.

Sonexa — Social Music Streaming Platform | *Next.js, TypeScript, Prisma, PostgreSQL, Docker* — GitHub | Live
- Built a full-stack web application with instant track search, YouTube/Spotify playback, and a creator dashboard for managing live queues.
- Implemented real-time listening rooms with synchronized playback, presence tracking, and community upvoting to shape the shared queue.
- Architected a pnpm + Turborepo monorepo with a shared **Prisma** DB package, containerized deployment, and GitHub Actions **CI/CD** automation for Docker builds.

Collaborative Real-Time Whiteboard | *Next.js, TypeScript, WebSockets, Prisma, Docker* — GitHub | Live
- Engineered a high-fidelity, touch-responsive collaborative canvas using the Raw HTML5 Canvas API, optimizing client-side performance and frame rendering for seamless cross-device compatibility.
- Architected a custom **WebSocket protocol** to handle asynchronous events, ensuring state synchronization across clients with sub-50ms latency.

Freshly — Cross-Platform Grocery & Meal Planner | *React Native, Expo, TypeScript, PostgreSQL* — GitHub | Live
- Built a cross-platform (iOS, Android, Web) grocery list and meal planner app with Expo Router file-based routing and typed API routes, backed by **Clerk authentication** and **secure token storage**.
- Designed a relational **PostgreSQL** schema via Drizzle ORM on Neon's serverless driver, exposing **REST** API endpoints for item CRUD, bulk-clear operations, and category/spending insights.
- Automated EAS builds/OTA updates and lint/typecheck **CI/CD** via GitHub Actions, with Sentry error tracking in production; implemented global state with Zustand and a NativeWind/Tailwind UI.

Certifications & Awards

KFintech Internship — Applied Fintech Engineering & Mutual Fund Technology: Completed program by KFin Technologies Ltd. with SOA University, covering transaction systems, regulatory compliance, data analytics, and cloud/DevOps.
Generative AI Systems: Certified by Microsoft via LinkedIn Learning.
Advanced Problem Solving: Certified by HackerRank for demonstrating strong proficiency in Data Structures and Algorithms.
LeetCode 500 Days Badge / GitHub Traction: 500+ day problem-solving streak and active open-source contributions.
Full Stack Web Development (100xDevs): Cohort-based training by Harkirat Singh on scalable systems and backend design.
